

We get geeks

Quite simply, Geeknet is the online network of geeks, created by geeks, for geeks.

Our network includes SourceForge, Slashdot, ThinkGeek, ohloh, and freshmeat.

Each month, we provide over **40 million geeks** with content, connections, commerce, and all the things that geeks crave.

Technology has invaded nearly every aspect of our personal and professional lifestyles. Geeks truly understand technology and can manipulate its capabilities to their benefit, and have become increasingly essential and admired.

We continually strive to create smart, highly interactive and targetable advertising solutions, connecting your brand with this remarkable group of active, affluent, & influential people.
