

# FUZEBOX<sup>®</sup>

---

## THE BEST ONLINE MEETING EXPERIENCE ON ANY DEVICE

**Powerful and flexible with a sophisticated, easy to use interface, FuzeBox significantly changes how and where people meet, collaborate and conduct business.**

Our cloud-based visual collaboration products provide the freedom and reliability to meet and share from anywhere, in any room, on any device.

Host engaging online meetings, deliver stronger presentations, broadcast flawless marketing webinars, share rich media, and collaborate from across the world. All in HD quality video with state of the art, crystal clear audio.

**The best online meetings start with a great experience.**

Welcome to FuzeBox.

# THE FREEDOM TO MEET & SHARE FROM ANYWHERE

**Powerful and flexible with a sophisticated, easy to use interface, FuzeBox significantly improves how and where enterprises and professionals meet, collaborate, and conduct business. Anywhere. On any device.**

- ✓ Cloud sharing reliably transcodes your content to render clearly for all meeting participants, regardless of device or network connection speed.
- ✓ Auto Reconnect feature allows you to pick up where you left off in the event of drop off due to connectivity and bandwidth issues.
- ✓ Record and publish meetings securely through the Fuze cloud.
- ✓ Available on Mac, Windows, iOS and Android smartphones and tablets.

**Industry-leading HD video quality** with up to 12 Video Streams and up to 100 meeting participants.

**HD VoIP Audio** and integration of traditional audio conferencing options.

**Sharing from your desktop is spontaneous and convenient.** Share your entire screen, a window, or a specific application.

**Share content from the Fuze cloud.** You and your meeting participants can select, control and annotate a broad range of HD rich media including digital images, presentation decks, and HD movie files.

**Telepresence interoperability.** Connect legacy hardware based video conference systems such as Cisco, Telepresence (Tanberg), Polycom, Lifesize, and other SIP or H.323-based devices to a Fuze meeting in HD.

**iPoint Annotation controller** acts as a laser pointer that lets you callout or highlight any specific content on your screen.

# THE WORLD'S FIRST CLOUD-BASED CONFERENCE ROOM

FuzeBox cloud conferencing solution provides a seamless collaboration experience from the board room or any size meeting room to remote participants anywhere and on any device.

- ✓ Upgrade any audio conferencing room into a highly immersive video conferencing room at a fraction of the cost
- ✓ Fully integrated and interoperable with your legacy hardware based video conferencing units
- ✓ Optimized workflow for “10 foot viewing” and starting or joining meeting with one touch simplicity
- ✓ Cloud based connectivity for both desktop and mobile devices such as Mac, PC, iPad, and Android devices
- ✓ Untethered content sharing that exceeds h239. No cables....Really!

**Industry-leading HD video quality** with up to 12 Video Streams and up to 100 meeting participants.

**Telepresence interoperability.** Create hybrid telepresence meetings with room systems and remote participants for professional presentations or collaborative team sessions.

**Record and publish meetings** securely through the Fuze cloud.

**HD VoIP Audio** and integration of traditional audio conferencing options.

**The ultimate choice for collaboration.** Share rich content with built in annotation tools from the cloud library or quickly screen share.

**One touch control.** Easily control your meeting directly from an iPad remote app or an optimized keyboard.

# POWERFUL & EASY TO USE: REDEFINING THE WEBINAR

The FuzeBox Events solution allows you to transform your next webinar into an engaging & collaborative video event with high fidelity audio and HD video feeds. Cloud based content sharing features guarantee a reliable broadcast. Deliver a high quality performance every single webinar.

- ✓ Simple, in application registration/ invitation process
- ✓ Branded templates for all webinar communications integrate with your email client or marketing automation system
- ✓ Compatible with all desktop and mobile devices
- ✓ Host up to 100 attendees

**Integrated event creation and registration capabilities**, as well as built-in registration tracking and reporting.

**Cloud-based rich content sharing** with built-in annotation tools

**Create robust reporting** to track key information such as user registration, attendance, and other meeting metrics.

**Unparalleled HD VOiP audio** and integrated Fuze audio bridge support

**Up to 12 HD video streams** accessible from desktop, iPhone, iPad, and Android devices

**Record and publish events** securely through the Fuze cloud.

Just comparing FuzeBox with other webinar services is like comparing Macbook Air to an old 1994 IBM ThinkPad.

# ELEGANT SOUND BEYOND ANYTHING YOU'VE HEARD BEFORE

Experience a new level of quality and reliability for online meetings with the NEW Symphony audio platform. Fuze is able to optimize global network performance and mitigate Internet latency, resulting in industry leading reliability and security. Poor audio can quickly derail and degrade meetings; Fuze Symphony creates a better meeting experience with more immediate, immersive conversations and higher engaged participants.

**Global infrastructure.** Incredibly low latency, crystal clear high fidelity, everywhere you go.

**High-definition, Noise Suppression VoIP.** The best quality immersive collaboration experience on any device with state of the art noise suppression.

**Integrated Conferencing Options.** Interoperability provides the scale and coverage needed to conduct business.

**Platform Agnostic.** Available on Mac, Windows, iOS, and Android smartphones and tablets.

**International Dial-In.** Options for 20+ countries worldwide.

## THE SYMPHONY EXPERIENCE

Improved audio quality makes it easier to hear what is being said and by which participant.

Faster overall performance - mitigate less than ideal internet conditions and reduce choppy video

Global cloud infrastructure provides unsurpassed security and reliability for businesses of any size.

Maximize productivity and collaboration through more engaging communication.
